### SUMMARY

Seeking to leverage my one year of experience in web development as a Python Developer to contribute to innovative projects, build user-centric applications, and enhance my professional growth in a dynamic organization.

---

### SKILLS

#### python

- Proficient in Python programming, with experience in developing web applications, and building efficient back-end systems.

#### Django

- Experienced in Django, with expertise in building scalable web applications, developing RESTful APIs, implementing authentication, and managing back-end functionalities.

#### MySQL

- Proficient in MySQL, with experience in designing databases, writing complex queries, optimizing performance, and managing data efficiently.

#### HTML,CSS

- Experienced in HTML and CSS, with the ability to structure web content effectively and style it to create responsive, user-friendly, and visually engaging websites.

#### git

- Skilled in using Git for version control, including pushing, pulling, merging branches, and cloning repositories to efficiently manage and collaborate on projects.

#### postman

- Proficient in using Postman for API testing, debugging, and documentation to ensure seamless integration and efficient functionality of RESTful APIs.

#### JMeter

- Skilled in JMeter for performance and load testing, with experience in creating test plans, analyzing results, and optimizing the performance of web applications and APIs.
-

## EDUCATION

### SRI KALISWARI COLLEGE, SIVAKASI

Bachelor Of Computer Applications

Madurai Kamaraj University | 2020 - 2023

GOVERMENT HIGHER SECONDERY

SCHOOL, VISWANATHAM,SIVAKASI

SSLC 2017-2018

HSC 2019-2020

---

## EXPERIENCE

### JUNIOR PYTHON DEVELOPER

unitrix infotech 2024-current

Designed and implemented Python-based solutions for web applications and backend services. Collaborated with teams to integrate Django frameworks with MySQL databases. Enhanced application functionality and fixed bugs to ensure optimal performance. Developed RESTful APIs to enable seamless data exchange between front-end and back-end systems.

---

## PROJECTS

### Title - Casabuy

#### descriptions

Casabuy is an e-commerce platform offering a wide range of products across categories like electronics, fashion, and home goods. With a user-friendly interface and secure payment options, it ensures a seamless online shopping experience for its customers.

### Title - Library Management System

#### descriptions

Created a Library Management System in Python with Django. The backend database uses MySQL. Useful for easy maintaining of records of books for a librarian. A librarian can check status of any book any time with the help of library management software.

---

## CERTIFICATIONS

Certified in Python, SQL, and Django from Login 360 (2024), with a strong foundation in web development and database management. Skilled in designing and implementing scalable applications, optimizing performance, and leveraging frameworks to deliver efficient solutions. Committed to continuous learning and professional growth in the tech industry.
